

Best Technology Offering. Big Business Platforms. Small Business Affordability.

We design and implement robust systems and digital solutions to align your problem-solving efforts and decision-making processes for faster, more effective results.

Our Offering

Enterprise Resource Planning (ERP)

We implement hosted Sage X3 SaaS solutions. This web-native business management solution is ideal for enterprises in the goods or services industries.

Business Intelligence Reporting

Our QlikView and Power BI implementations provide insights that ignite great ideas and answer critical business questions.

Document Management Solutions

Through DocuVision we implement system-driven workflows for approvals, storage, and easy retrieval of electronic documents.

Business Process Optimisation

Our business process optimisation service ensures that the ERP implementation supports your business model and objectives.

Why Us

We provide:

highly qualified consultants boasting a combined 50+ years of ERP implementation experience.

an integrated support team who are on standby to assist with any technical or financial queries.

a solution that avoids investments in non-core people and technologies.

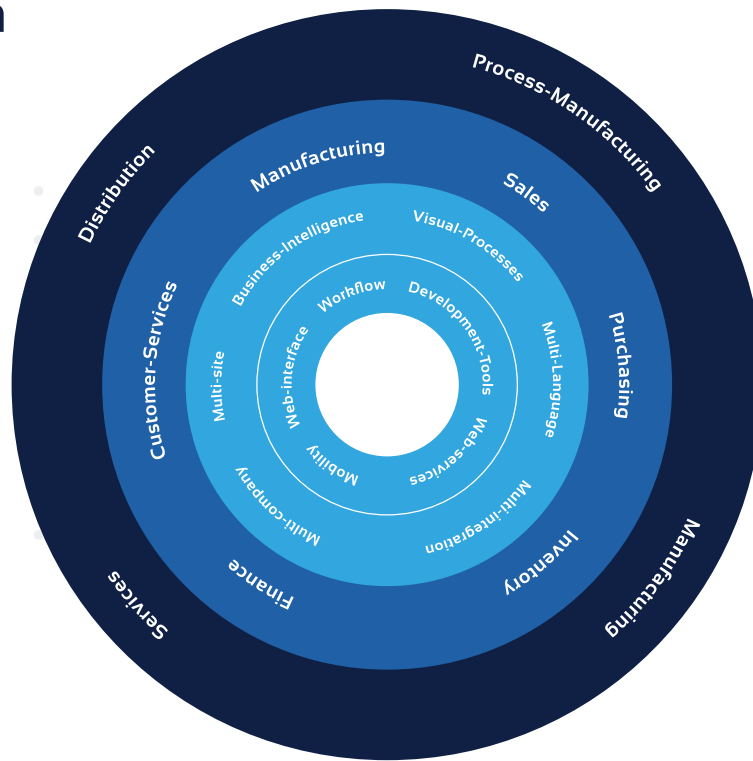

a solution that reduces IT infrastructure worries.

an enhanced implementation journey through Group knowledge specialising in Supply Chain and Logistics, Smart City and Business Systems.
